## Summary

Passionate and creative web developer and android developer with strong portfolio of projects showcasing user- friendly websites and mobile applications.

## Technical Skills

- **Programming Languages:** Python, JavaScript, HTML, CSS, Kotlin, DSA (with JavaScript)
- **Tools & Platforms:** Git, GitHub, VS Code, AWS, PyCharm, Canva, Replit, Android Studio, Jetpack Compose
- **Databases:** MySQL
- **Frameworks & Libraries:** React.js, Express.js, MongoDB, Django, Tailwind CSS
- **Soft Skills:** Leadership, Critical Thinking, Public Speaking, Empathy

## Projects

**Chatting App:** Developed a real-time chatting application using Kotlin and Android Studio. The app supports individual and group chats, multimedia message sharing, and real-time notifications. Implemented Firebase for backend services.

**E-commerce App:** Created an e-commerce application that allows users to browse products, add them to the cart, and make secure online payments. Integrated APIs for product listing, order management, and payment gateways.

**Portfolio App:** Designed and developed a personal portfolio app that showcases my projects, skills, and experiences. The app includes interactive elements, such as a contact form and links to my professional social media profiles.
